

## Prof. dr. ir. Alain De Wulf

### 3D Data Acquisition

alain.dewulf@ugent.be

Prof. dr. ir. Alain De Wulf is full-time professor at Ghent University (Belgium), researching and lecturing on the general principles of 3D data-acquisition techniques in the domains of land and hydrographic surveying and quality aspects of geodesy in particular. He is involved with his scientific research team in different projects, ranging from topographic campaigns for archaeological projects (Malta, Altai (Russia), Thorikos, Titani (Greece), etc.) till bathymetric projects involving vertical reference surfaces and GNSS buoy tide measurements.
